

TITAN R/RX

PORTABLE RECHARGEABLE WORK LIGHT

CHOOSE BETWEEN FLOOR-STANDING OR MAGNETIC BASE

The SafATEX Titan R and RX are robust, rechargeable LED floodlight designed for Zone 1 and 21 hazardous areas. With up to 2100 lumens of output and a tilt-able head, it provides flexible, high-intensity lighting for construction sites, warehouses, and emergency response. Available with magnetic or stand mounting, and built to withstand tough conditions, it's the go-to solution for safe, reliable illumination in explosive atmospheres.

KEY FEATURES

- **High-output flood beam** delivers wide-area illumination in large workspaces
- **Adjustable light head** tilts up to 135° for precise beam placement during inspections or site tasks
- **Multiple mounting options** including magnetic base or stainless steel stand for flexible deployment
- **Rechargeable lithium-ion battery** provides up to 10 hours of runtime for extended operations
- **Rugged aluminium housing** with IP66 protection ensures durability in demanding environments
